

I am writing this with dissapointment that the FCC is proposing to prioritize the broadcast service, maybe you do not realize the positive, wholesome impact that K-Love (a FM translator station) has on our world today. It is something any age can listen too, and it does not promote sex, drugs or smoking. Kinda nice ya think, I know I like knowing my kids and grandchildren have K-Love to listen to for positive encouragement all day - every day. Everyone needs this some time or another. I urge you to not change the broadcast service priority. Leave all these stations on the air for all of us to listen to when we want and/or need to. I know there are alot of people that listen to K-Love and I learn of more and more all the time.
